

## INSTRUCTION MANUAL Replacing Adapt-A-Door A2 Heater IM-281-20

**1** Thread Heater Wire Assembly black & white leads through bottom hinge side of door cap and towards crossover cord hole at top of door cap (use existing wires to thread if needed).

**2** Insert loop end of Heater Wire Assembly (at bottom of door cap) into ADPT Frame Hard Board grooves and install inside ADPT Frame Hard Board Retainer (wire side against inside of Retainer), secure with Aluminum tape. ENSURE HEATER WIRE DOES NOT LINE UP WITH HARD BOARD REATINER SCREW HOLES.

**3** Secure ADPT Frame Hard Board Retainer (with Heater Wire and Hard Board installed) to bottom interior of Door Cap with #8 x 1/2" screws. ENSURE SCREWS DO NOT DAMAGE HEATER WIRE. If required, Heater Wire Assembly black & white leads (at the top of the Door Cap) can be pulled to remove excess wire length at bottom of door cap.

**4** If required...install ADPT Frame Sweeper Gasket

**5** If required...install Interior Wiper Gasket.

**6** Using wire nuts, connect black and white Heater Wire Assembly leads to existing power source at top of Door Cap.

**7** Reinstall Crossover Cord assembly.
